Chimney pots, Yesterday and Today

Chimney pots have a long and important architectural history, both in the US and abroad. Pots largely began to show up in America during the Victorian era, when coal was a primary source of heat. Because they increase the draft through chimneys (and coal soot was definitely something you wanted to go up the chimney – not into the house), chimney pots were found on homes and buildings throughout the country. Those old pots are still a common sight in many American cities.

Today, most chimney pots are purchased for their unique ability to add beauty and character to fine properties. Easy to install, they can be an intriguing accent to any house and can convey a sense of strength, comfort, or other characteristics to the home. Have fun mixing and matching pots, and remember: it's typical to put a chimney pot on every flue.

Why Order from ChimneyPot.Com?

We are, simply put, the world's largest supplier of chimney pots. This isn't a side business for us – it's what we do. By offering chimney pots from every major manufacturer and importing custom and antique pots from around the world, we are able to supply the right chimney pot for every architectural need. We have the expertise to help you find the right size and style to fit your needs. We also hand-inspect every pot we sell. Just call us! We'll walk you through everything you need to know.

VICTORIAN-ERA

Most chimney pot styles were developed during the Victorian era, between 1800 and 1900. These styles are in continued use today, adorning homes that range from traditional to quite modern.

ChimneyPot.Com stocks over 1,000 new and antique Victorian style chimney pots.

*available by special order Buff & Glazed.

All chimney pots are hand-made terra cotta and dimensions may vary.

ANTIQUE

In addition to new chimney pots, ChimneyPot.Com offers an extensive selection of antique pots. To ensure the finest quality, we travel throughout the world identifying sources, and we hand-select and inspect each of our pots individually. Available in a variety of colors, glazes, and patinas (based on the regional style and climate of their original home) antique pots often give a softer, subtler look to a property. They also lend an immediate sense of age to homes being built in a period style.

MAGNUM

Today's houses are bigger than ever, with larger fireplaces, too. We offer a premium selection of very large chimney pots suited to larger flues and chimneys. As with their smaller cousins, magnum chimney pots come in a variety of shapes, styles, and finishes. Many people mix and match with smaller pots.

**available by special order Buff & Glazed.*

All chimney pots are hand-made terra cotta and dimensions may vary.

RAINGUARDS

Regional conditions sometimes call for rainguards, which keep rain from entering the flue through the chimney. ChimneyPot.Com offers a selection of terracotta rainguards to complement our new chimney pots. All chimney pots are hand-made terra cotta and dimensions may vary.

How to Measure

Base ID is the inside of the chimney pot that fits on to your flue, the Base ID must be as large or larger in diameter than your flue. Base OD is the total diameter of the chimney pot, there must be a enough space on the chimney for the pot to sit.

Height

Base OD

How to Order

To place an order, please call us for information on availability, size, and color. It is important that you know the flue size of the chimney. When we have established which chimney pot is right for you, we will accept payment by Visa or MasterCard. In-stock orders take approximately one week to deliver. Our chimney pots are fired ceramic and we take great care in crating and shipping to ensure that you receive your purchase in excellent condition. We ship throughout the United States and the world.
